

**To:** All PINMRF Users  
**From:** John Harwood (jharwood@purdue.edu)  
**Date:** May 12th, 2009  
**Subject:** NMR Reference Book Library

Thanks to the generosity of Prof. George Bodner, PINMRF now is in possession of a collection of over forty NMR textbooks. These books include both older, classic, texts as well as newer books covering topics such as 2D NMR and NMR applications to macromolecules. There are a wide variety of books covering almost all topics in NMR.

These books currently are located on the shelf of one of the cubicles in room 369 WTHR. We urge all of you to peruse the books while you are in the laboratory waiting for that C-13 run to finish. If there is sufficient interest, we will set up a check-out system to allow users to borrow books from the collection.

Thanks again to Prof. Bodner for this gift to the Facility.

If you have any questions or comments, please feel free to contact me.
